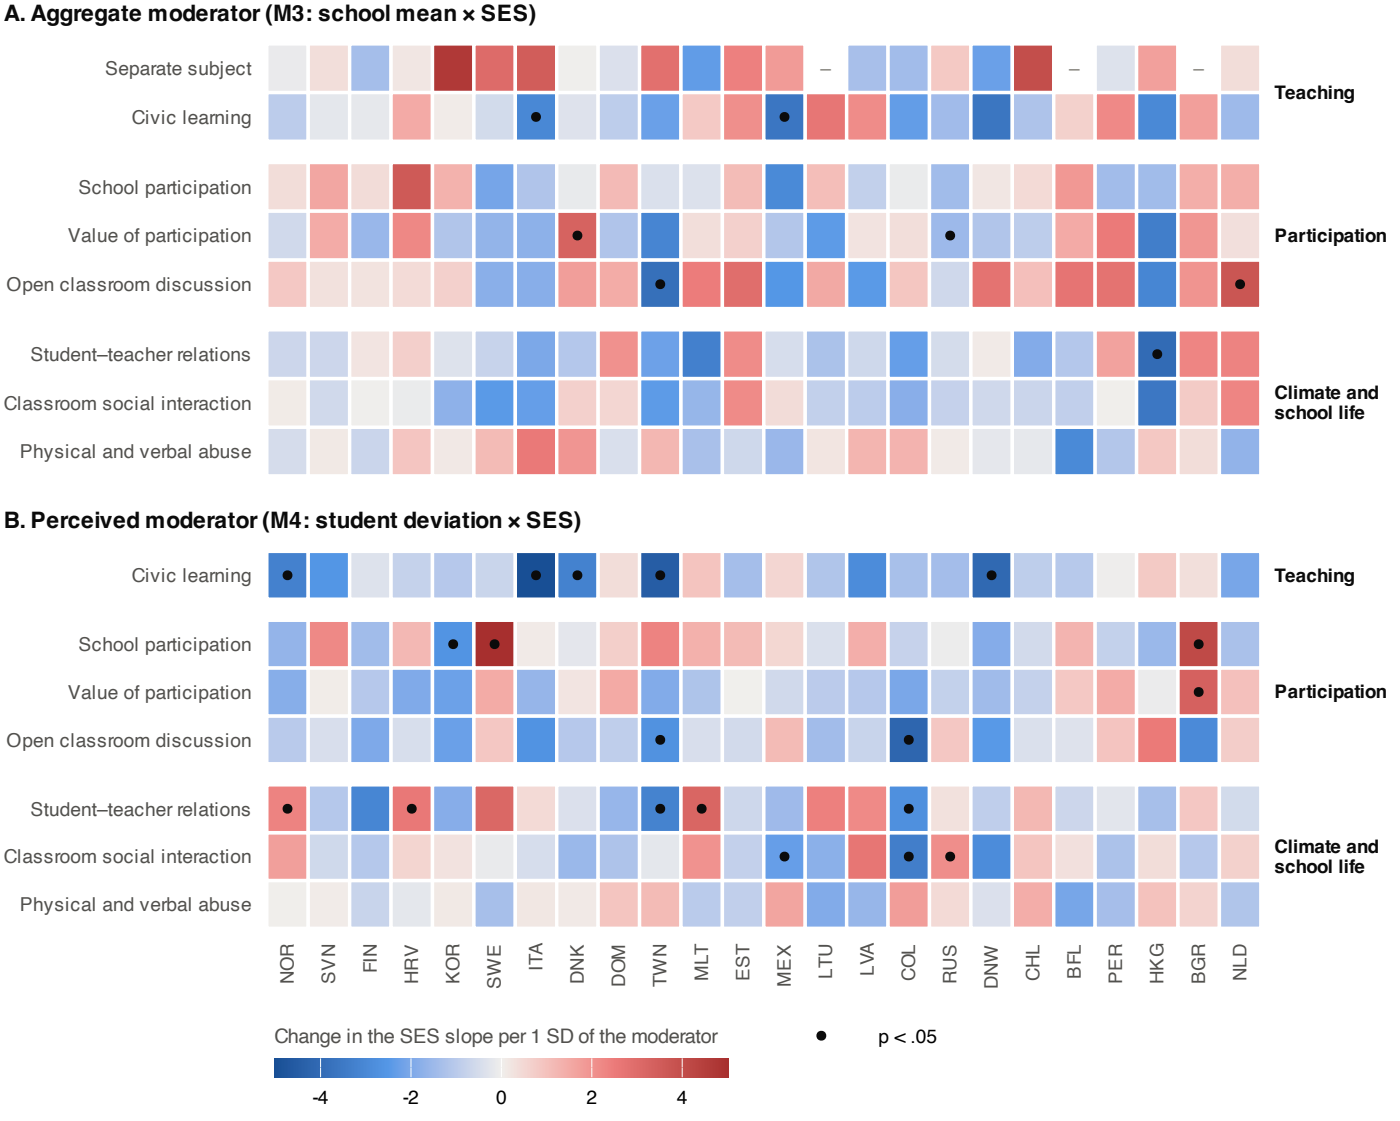
Figure 2. Moderation of the socioeconomic gap by school characteristics

Blue: the within-school SES gap is smaller where the moderator is higher (mitigation).
Red: it is larger (acceleration). Systems ordered by ICC, lowest to highest.



Interaction coefficient multiplied by the moderator's SD (M3: between-school SD; M4: within-school SD; separate subject: SD of the proportion of schools). Abuse measures a negative climate: blue indicates a smaller gap where there is more abuse. –: item not administered. Unadjusted p; unweighted; first plausible value.
